

# 2016 End-Use Market Survey on the Polyurethanes Industry

In the United States, Canada, and Mexico

Center for the Polyurethanes Industry

Developed by IAL Consultants on behalf of the Center for the Polyurethanes Industry (CPI) of the American Chemistry Council, this latest study, comprising of more than 300 pages, 150 tables, and 95 charts and diagrams, provides a detailed analysis of the major end-use markets for polyurethane in North America for 2016.

The 2016 End Use Market Survey for the Polyurethanes Industry in the United States, Canada and Mexico, provides a breakdown of polyurethane production by type and by major end-use market, for each country. In addition, a historical review of data from 2008-2016 is presented.

Charts presenting 2016 market data and a summary of the demand for major raw materials including isocyanates, polyols, renewable chemicals (including natural oil polyols) and additives will be available in Excel format with purchase of the full study. The latest available industry data for the major end-use markets (automotive, refrigeration, furniture, bedding, building and construction) also are included.

The study continues to build upon previous reports published by CPI for the polyurethanes industry in the United States, Canada and Mexico.
