The 2018 End-Use Market Survey was prepared by IAL Consultants for the Center for the Polyurethanes Industry (CPI) of the American Chemistry Council (ACC). This 300+ page report provides a detailed analysis of the major end-use markets for polyurethane in the United States, Canada, and Mexico.

The 2018 End Use Market Survey for the Polyurethanes Industry in the United States, Canada and Mexico, provides a breakdown of polyurethane production by type and by major end-use market, for each country. In addition, a historical review of data from 2010-2018 is presented.

Charts presenting 2018 market data and a summary of the demand for major raw materials including isocyanates, polyols, renewable chemicals (including natural oil polyols) and additives will be available in Excel format with purchase of the full study. The latest available industry data for the major end-use markets (automotive, refrigeration, furniture, bedding, building and construction) also are included.

The study continues to build upon previous reports published by CPI for the polyurethanes industry in the United States, Canada, and Mexico.
